

AMENDMENTS TO THE CLAIMS:

Without prejudice or disclaimer, this listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-8. (Cancelled)

9. (Previously Presented) A method of treating gastric mucosa injury caused by urease, which comprises administering to a person in need thereof a therapeutically effective amount of an isothiazole compound represented by formula (1):

wherein R¹ represents a hydrogen atom or an amino group, R² represents a hydrogen atom, a lower alkyl group, or an acetyl group, and X represents a carbon atom or a nitrogen atom, or an adduct salt thereof.

10. (Previously Presented) A method according to claim 9, wherein the isothiazole compound is at least one selected from the group consisting of 1,2-benzisothiazol-3(2H)-one, isothiazolo[5,4-b]pyridin-3(2H)-one, 5-amino-1,2-benzisothiazol-3(2H)-one, N-methyl-1,2-benzisothiazol-3(2H)-one and N-acetyl-1,2-benzisothiazol-3(2H)-one.

11. (Previously Presented) A method according to claim 9, wherein the gastric mucosa injury comprises chronic gastritis.

12. (Previously Presented) A method according to claim 9, wherein the gastric mucosa injury comprises gastroduodenal ulcer.

13. (Previously Presented) A method according to claim 9, comprising administering the isothiazole compound in a daily dose of from about 0.1 to 100 mg/kg.

14. (Previously Presented) A method according to claim 9, further comprising administering at least one additional pharmacologically active ingredient chosen from antibiotics, nitronidazole antiprotazoal agents, antiulcer drugs, and proton pump inhibitors.

15. (Previously Presented) A method according to claim 9, wherein the urease comprises urease produced by *Helicobacter pylori*.

16. (Previously Presented) A method of treating gastric mucosa injury caused by *Helicobacter pylori*, which comprises administering to a person in need thereof a therapeutically effective amount of an isothiazole compound represented by formula (1):

wherein R¹ represents a hydrogen atom or an amino group, R² represents a hydrogen atom, a lower alkyl group, or an acetyl group, and X represents a carbon atom or a nitrogen atom, or an adduct salt thereof.

17. (Currently Amended) A method of treating chronic gastritis caused by urease, which comprises administering to a person in need thereof a therapeutically effective amount of an isothiazole compound represented by formula (1):

wherein R¹ represents a hydrogen atom or an amino group, R² represents a hydrogen atom, a lower alkyl group, or an acetyl group, and X represents a carbon atom or a nitrogen atom, or an adduct salt thereof.

18. (Previously Presented) A method of treating a gastroduodenal ulcer caused by urease, which comprises administering to a person in need thereof a therapeutically effective amount of an isothiazole compound represented by formula (1):

wherein R¹ represents a hydrogen atom or an amino group, R² represents a hydrogen atom, a lower alkyl group, or an acetyl group, and X represents a carbon atom or a nitrogen atom, or an adduct salt thereof.

19. (Currently Amended) A method of treating chronic gastritis caused by *Helicobacter pylori*, which comprises administering to a person in need thereof a therapeutically effective amount of an isothiazole compound represented by formula (1):

wherein R^1 represents a hydrogen atom or an amino group, R^2 represents a hydrogen atom, a lower alkyl group, or an acetyl group, and X represents a carbon atom or a nitrogen atom, or an adduct salt thereof.

20. (Previously Presented) A method of treating a gastroduodenal ulcer caused by *Helicobacter pylori*, which comprises administering to a person in need thereof a therapeutically effective amount of an isothiazole compound represented by formula (1):

wherein R^1 represents a hydrogen atom or an amino group, R^2 represents a hydrogen atom, a lower alkyl group, or an acetyl group, and X represents a carbon atom or a nitrogen atom, or an adduct salt thereof.
